The data below summarizes Q3 2022 performance, and more than likely provides a glimpse of what the rest of the year will look like.

The 3rd quarter of 2022, like 3 of the last 4 saw a decrease in new listings, sold units, and total dollar volume. The total amount of new listings was the lowest it's been in at least the past 5 quarters, and was down 129% when looking at the same time last year. Sold units follows the same trend, down 127% over the previous year, and 43% below the previous quarter while the total dollar volume was down around 120%.

Despite this, there were a few bright spots - Average days on the market was still below 30 while the average list price was up 9% year over year, and the median and average sold price were slightly above Q3 of 2021.
